Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 August 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

In view of the appeal brief filed on 8/21/06, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Crofoot (4,026,082)** in view of **Snyder (6,601,356)** and further in view of **Crute, Jr. (2,834,278)**. **Crofoot** discloses the applicants primary inventive concept including a vent frame/cover (SEE Figures 1, 2, 5 and 6) which can be attached to cover an opening in a wall (and hence a crawlspace opening), it has a rectangular panel (SEE Figure 1 & 3) molded from hard plastic materials (SEE column 2, lines 40-42) and a flange portion which mounts the vent cover flush with the wall structure. A flat outer surface (10) is surrounded by recessed peripheral border (shown in figure 2). The vent cover furthermore includes projecting reinforcing ribs (4) which reinforce the panels against warpage when they are fastened to the wall (SEE column 2, lines 36-42). The ribs project outwardly from the surface of which they are attached, extending the width of the recess and are spaced "about" 3 inches from at least one other rib (SEE Figure 6). **Crofoot** does not particularly disclose a plurality of holes for receiving attachment means for fastening the cover to the crawlspace wall, however the rectangular vent cover taught by **Snyder** teaches a plurality of screw holes (105) in the flange portion of the frame. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to have modified the flange portion of the vent frame of **Crofoot** to include screw holes with accompanying screws as taught by **Snyder** for the purpose of securing the vent frame/cover to the wall of a building structure. With regard to claims 2 and 3, **Crofoot** discloses the sealing of the vent cover to the peripheral wall (SEE column 3, line 41-64) but does not the bonding as described by the applicant.

Art Unit: 3749

Crute, Jr. Teaches that it is known to provide a vent cover with a sealing gasket and also for sealing engagement with the adjacent surface of the wall around the opening therethrough (SEE column 2, lines 14-19). It would have been obvious to a person having ordinary skill in the art to at the time the invention was made to provide the closure of Crofoot with the sealing means as taught by Crute, Jr for the purpose of providing a continuous seal between the border of the vent cover and the surface of the adjacent wall.
